QUALITY FLOORING FOR A HEALTHY FAMILY

ENGINEERED WOOD FLOORING 1+1 SOLID WOOD

The 1+1 Log series is the latest two-layer solid wood floor from Royally Flooring that is made of European oak, using Finnish Dynea non-aldehyde glue technology to truly achieve green and healthy home. The 1+1 Log is the first of its kind in the industry in reducing the traditional three-layer solid wood floor by one layer yet keeping the strength of the material, resulting in a healthy and environmentally friendly product.

ENGINEERED WOOD FLOORING SUPER SOLID WOOD

The Masterpiece series is designed with the three core concepts of “easier installation”, “more environmental friendly” and “healthier without seam”. The keel is engineered together with the floor to allow easier installation. Besides, the seamless installation can completely avoid the pollution from the residue of harmful substances. Using oak wood from Russia, the product is featured with active antimicrobial technology, slip-resistant, and compliance with German food grade standards, which can ensure the safety and environmental friendly for pregnant women, children and the elders.
